

# Georgi Petrov

## Junior Software Engineer

I'm studying software engineering at University "Prof. d-r Asen Zlatarov" Burgas. I do my best to further develop and evolve my skills with the courses I take at SoftUni Academy, where I have fully completed the Java web developer course. Currently I'm working on my final project, it's going to be an application for online book content. My interests include the whole area of computer science and I'm pursuing opportunities to learn and improve my communication and project management skills. I'm open to junior positions and internships, as well as learning new technologies.
